

SHREDDER LINE INSTALLATION KINGSFORD, MICHIGAN

Scope: Gundlach Champion, Inc. (GCI) was selected as the Design-Build contractor to design, construct, and install a new support building, foundations, and shredder line equipment for Schneider Iron & Metal, located in Kingsford, Michigan.

The new building was designed to house Schneider's Metso 80/104, 60-tons-per-hour, new-generation heavy service damp shredding plant. This upgraded facility also consists of six material handling conveyors, used to separate non-ferrous material, aluminum, and stainless steel. Additionally, this state-of-the-art shredder line is powered by a 2,500 HP electric motor.

In addition to the design-build services, Gundlach Champion, Inc. self-performed the existing equipment demolition, concrete, precast concrete erection, and equipment setting. The project took 5 months to complete, and was turned over to the owner in the fall of 2013.

Owner: Schneider Iron & Metal

Project Location: Kingsford, MI

Architect: Gundlach Champion

Project Duration: 5 months

Project Completed: November 2013
