

HUMBOLDT MILL MEP BUILDOUT: CHAMPION, MICHIGAN

Scope: Gundlach Champion, Inc. (GCI) was selected by Lundin Mining for a major build-out package at the Eagle Nickel & Copper Mine processing plant, located in Champion, Michigan.

Gundlach Champion's scope of work was largely self-performed, and included the installation of concrete, masonry, structural and miscellaneous steel, pre-engineered metal buildings, conveyors, and a number of large pieces of major equipment. GCI subcontracted the civil site work, specialized architectural trades, HVAC and plumbing, process piping, tank installation, electrical work, and instrumentation.

This 8 month, fast-tracked project required overtime, second shift, and Sunday work to meet the owner's desired completion date. This project was successfully constructed during one of the Upper Peninsula's harshest winters on record, and at peak, the site workforce topped out at nearly 400 trade personnel. GCI delivered this completed project in the late fall of 2014.

Owner: Lundin Mining

Project Location: Champion, MI

Architect: Fluor Enterprises, Inc.

Project Cost: \$62.0 million

Project Completed: December 2014
