

HANNAHVILLE WASTEWATER TREATMENT FACILITY: WILSON, MICHIGAN

Scope: This wastewater treatment system for the Hannahville Indian Community features a service building which houses a lab office, maintenance area, chemical feed room, blower room, odor control room and a screen room. This facility houses the operations of the treatment tanks, sludge storage tank, digester tank and lagoons that make up the treatment system. Extra space has also been allowed on the side to make room for future tanks.

Owner: Hannahville Indian Community

Project Location: Wilson, MI

Architect: Wilcox Professional Services

Project Cost: \$4.3 million

Project Completed: December 2006
